-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 and claims 5-9, which depend from claim 4, are unclear because claim 4 is written as depending from itself. While the examiner assumes that claim 4 was intended to depend from independent claim 1, repeated attempts to reach applicant's attorney by telephone to confirm this assumption were unsuccessful. These claims must therefore be rejected because the metes and bounds of their limitations are unclear.

Claims 1-3 and 10-14 are allowed.

Claims 4-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

While Wu et al. teaches to place graphite liners having parallel saw-toothed protrusions on the inside of a mass analyzer magnet in an ion implantation apparatus (to reduce the production of secondary electrons from the inner walls of the analyzer), there is no suggestion to place such liners on interior surfaces of the ion implantation chamber or between an accelerator and the ion implantation chamber. Blake, on the other hand, teaches to provide particle collectors at these locations, but there is no suggestion to use collectors having surfaces with parallel saw-toothed protrusions.
